

REMARKS

This is in response to the Office Action dated June 9, 2006. With this Amendment, Applicant has amended claim 11, canceled claims 19-20 and added new claims 21-22. In addition, Applicant elects the claims of invention I and elects species F that corresponds with FIGS. 9-1 and 9-4. Therefore, at least claims 1-18 and new claims 21-22 read on the elected invention and species.

It is respectfully submitted that claims 1, 9, and 21 are generic claims that read on at least Invention I and species F of the present invention and are in condition for allowance. Therefore, dependent claims 2-8, 10-18 and 22 are also in condition for allowance.

In regards to item 7 in the Office Action, the Applicant respectfully points out that reference character "356-2" has only been used to designate adhesive receiving features (i.e., in the Examiner's words "recesses") and not to designate a body (i.e., in the Examiner's words "projections") as shown in FIG. 3-2. Please note reference numeral 352-2 versus reference numeral 356-2. Therefore, the objection to the drawings should be withdrawn.

In regards to item 8 in the Office Action, the Applicant respectfully points out that reference number 466 shown in FIGS. 4-1 and 4-2 has been described in paragraph 31 of the published application and on page 7, line 11 of the filed patent application. Therefore, the objection to the specification should be withdrawn.

The Director is authorized to charge any fee deficiency required by this paper or credit any overpayment to Deposit Account No. 23-1123.

Respectfully submitted,

WESTMAN, CHAMPLIN & KELLY, P.A.
